Olumide E. Adeola

Full Stack PHP Developer (Laravel)
https://chasfatproject.netlify.app   emmanueladeola990@gmail.com

SUMMARY

Results-driven Full-Stack Developer with over 3 years of experience specializing in PHP-based web development. Proficient in creating dynamic, user-friendly applications using modern frameworks and technologies, with a strong focus on performance, scalability, and maintainability.

EXPERIENCE

Full-Stack Developer | Chasfat Projects | Nigeria | Oct 2024 - Present

- **Developing PHP-Based Applications:** Spearheading the development of a range of PHP applications, including an e-portal for a secondary school, enhancing administrative efficiency and student engagement.

- **Class Website for Medical Class:** Designed and managed a class website for medical students hosted on Webhostapp, providing resources, and interactive features for students.

- **Laravel Quiz Application:** Developed a quiz application using Laravel, Inertia and Vue.js enabling users to create, share, and track quizzes while managing user data securely.

- **E-Commerce Application:** Built an e-commerce platform focused on delivering a seamless shopping experience, integrating payment gateways and user authentication.

- **Voting Application:** Created a voting application that allows users to participate in polls, emphasizing security and ease of use through robust backend management.

- **Ongoing Learning and Development:** Continuously expanding skills through the development of several applications and projects, focusing on debugging, database management, and PHP frameworks.

- **Bethel Attendance Tracker:** Developed an attendance tracker for a church using Laravel, enabling efficient data collection and management of attendance records. Implemented features real-time data entry, and reporting to enhance administrative efficiency.

VOLUNTEERING

Volunteer Developer | Monimoore | United Kingdom | 2024

- Contributed to the development of Monimoore, a platform that allows users to integrate their finances into a single, user-friendly interface.
- Gained hands-on experience with Docker for containerization, improving deployment efficiency and scalability of the application.
- Collaborated within a cross-functional team to design and implement microservices architecture, enhancing system modularity and performance.

- Engaged in troubleshooting and debugging processes, resolving issues to enhance application stability and user experience.

Volunteer Developer | U-Recover App | Nigeria| 2024 - Present

- Collaborated with U-Recover, an organization dedicated to providing comprehensive solutions for individuals affected by addiction and related issues.
